| Software title    | <b>ClearCalcs</b>           |
| Software Category | General Structural Analysis |
| Provider          | ClearCalcs                  |
| Software type     | Commercial                  |
| Is Featured       | No                          |
| Price             | <b>\$ 30,00</b>             |

### Other Information

|                    |   |
|--------------------|---|
| <b>Description</b> | ClearCalcs is an easy to use online structural design and analysis software. Quickly produce computations for beams, columns, portal frames, and more. ClearCalcs has a broad range of beam, column, and frame design and analysis tools for quick structural engineering computations. References and formulas are available at the click of the button so engineers can be exactly sure of what they are designing and why. With a clear and easy to use interface that includes simple to understand traffic light checks, ClearCalcs makes it easy for engineers to work quickly. |
| Rate:              |    |

### Supported Operating Systems:

1/ Android

2/ iOS

3/ Linux

4/ UNIX

5/ Vista

6/ Win7

7/ Windows Server 2008
