

Structural Engineering Software

Michigan

090909090909

secretariat@geoengineer.org

Software title	Footings
Software Category	Foundations
Provider	Sample Agent
Software type	Commercial
Is Featured	No
Price	\$ 40,00

Other Information

Description	<p>This program will help you design single or adjacent footings, wall footings, spread footings and a lot more. You can adjust the way the program reviews the data to fit whatever code requirements you are working to.</p> <p>Footings will help the Engineer design spread footings with single or multiple columns. The program checks soil bearing and will size the footings main rebar. The program will also provide pier loads on pier supported footings. You can adjust the way the program reviews the data to fit whatever code requirements you are working with.</p>
Rate:	

Supported Operating Systems:

1/ Win2000

2/ WinNT

3/ WinXP
